Marryatt's Code.

PREFACE TO THE SECOND EDITION.

FIVE years have elapsed since the present system of signalizing was introduced, and the Compiler trusts that it has been found to have many advantages over the old plan of numerals.

In the edition of 1845,—in which the Flags used were in numerals,—the sentences in Part V number one thousand and eighty-three—nine of which could only be made with one Flag, eighty-one with two Flags, six hundred and thirty with three Flags, when a fourth Flag was obliged to be used : whereas by the present system of letters, the following facts show a decided improvement.

In the first edition of the present Code, there were three hundred and twenty-one more sentences than in that of 1845, and the advantages of signalizing over the old plan are as follow :—Eighteen signals can be made with one Flag, three hundred and six with two Flags, and the remainder—consisting of one thousand and ninety-eight sentences—can be shown with three. In this edition there are some three or four hundred more sentences requiring only three Flags.

In the present edition *Marryatt's Flags only are used*, but have been so arranged, that it is not possible for a sentence in the Pilot's Code to be *made*, which, on looking into Marryatt's Signal Book, could convey any sense in its purport ; there is therefore no possibility of confusion.

The Compiler begs to tender his warmest acknowledgments to those who have rendered him material assistance in the compilation of this Work.

EXPLANATION OF PARTS OF CODE.

PART I.

Distinguished in the Pilot's Code by the Service Pendant over letter.

Distinguished in Marryatt's Code, as painted in the Book, by Marryatt's 4th Pendant over Marryatt's Flags corresponding to the letter as placed in Marryatt's Code; the Service Pendant will not be seen as the Upper Flag in any other part of this Code.

PART II.

Distinguished by the East India Jack over letter in the Pilot's Code and the White Flag *underneath* the letter in Marryatt's Code.

PART III.

Distinguished in Pilot's Code by the Buoy Flag over letter.

Distinguished in Marryatt's Code by Ensign over letter.

This Flag, which is letter V, will not be seen as the Upper Flag in any other part of this Code.

PART IV.

Distinguished in Pilot's Code by the Rendezvous over letter.

Distinguished in Marryatt's Code by the Rendezvous Flag over letter. The letter T will not be seen as an Upper Flag in any other part of this Code.

PART V.

Shows no distinguishing Flag in either Code; the letters T, V, and W will not be seen as Upper Flags in this part of the Code.

PART VI.

Distinguished by Compass Signal over letter in both Codes.

PART VII.

NIGHT SIGNALS.

GENERAL INSTRUCTIONS
FOR THE
PROPER USING OF THIS CODE.

I.

When Pilots of Merchant Vessels are desirous of signaling with each other in this Code, the following plan is in every case to be adopted : The vessel's number is to be made with whom the party wishes to signalize, *and the White Flag shown underneath the number* ; this will show to the Pilot of the ship whose number is made that the Pilot's Code is about to be used.

II.

When Pilots of Merchant Vessels are desirous of signaling with Government Vessels, *the White Flag is to be shown underneath the letter, corresponding to the vessel's name in Marryatt's Code.*

III.

When Pilots of Merchant Vessels are desirous of signaling with Lighthouses or Telegraph Stations, the Rendezvous Flag over letter in *Marryatt's Code* is to be used, *White Flag underneath* ; this will show to the man in charge of such Lighthouse or Telegraph Station that the Pilot's Code is to be used.

IV.

When Government Vessels wish to signalize with each other using this Code, *are in every case first to hoist the*

Code Signal; on this being answered, both parties are to understand that the Pilot's Code is to be used.

V.

Should a Merchant Ship not have Marryatt's Pendant (4) on board, and the Pilot of such vessel carries a Private Flag, it can be used to take the place of letter W., *so that any Flag not in the Marryatt's Code, seen in any signal, it is to be understood as meaning letter W. in Marryatt's Code or Pilot's Private Flag.*

VI.

When Government Pilot Vessels signalize the number of each grade, the following plan is to be adopted :—

If only Branch Pilots are on board, the signal showing the number is to be hoisted as heretofore.

When both Branch and Brevet Branches, the Answering Pendant shown between two Flags denotes the Upper Flag as Branch, the Lower as Brevet Branch. When only Brevet Branches are on board, the Answering Pendant is shown underneath a Flag.

When signalizing the number of Masters on board, in order to distinguish Senior from Junior, the following plan is to be adopted :—

If any Senior Masters, the number will be hoisted as heretofore.

If both Seniors and Juniors, the Second distinguishing Pendant is to be used in a similar manner as the Answering Pendant in the case of Branch Pilots.

In signalizing the number of Mates, the third Pendant is to be shown as in that for Masters.

VII.

All depths of water will be signalized reduced to zero in feet by the Numeral Flags of Marryatt's Code, with Marryatt's Numeral Pendant over.

All distances will in like manner be signalized in yards.

VIII.

Pilot Vessels attending distressed ships will on sighting a Red Buoy hoist Buoy Flag at Main ; on sighting a Black Buoy, Buoy Flag at Fore ; on seeing two Buoys at the same time on opposite sides of the Channel, the Buoy Flag at Main will denote a Western Flag, and the Red Flag at Fore an Eastern one.

IX.

Buoy Vessels when laying a Western Buoy, will show at Main a Red Flag.

When laying an Eastern Buoy, will show at Main a Blue Flag.

When laying a Wreck Buoy, will show at Main a Buoy Flag.

When laying a Fair Way Buoy, will show at Main a Buoy Flag.

X.

The Interrogative Flag, when shown over a signal, will give the sentence an interrogative character, and in the case of such signal being made by a Junior to a Senior Officer, is also to be considered as asking permission to carry out the purport of the signal.

XI.

Each part of the present Code will have blank place where the subject finishes for the purpose of entering any additional matter, when the sanction of competent authority has been obtained.

XII.

The Fourth Pendant Marryatt's, in Marryatt's Code, takes the place of the Private Flag in the present Code letter W, there was no other plan to be adopted, unless every running Pilot carried a Private Flag; in such a case the Private Flag could have taken the place of the Fourth Pendant, but as such is not the case, and the Code would be incomplete without a Flag, nothing else can be done.

When wishing to signalize the number of Officers on board, depth of water, or any signals where numerals are required, the old system is to be adopted, commencing from letter G, in both Codes which represents No. 1, and so on till R, which represents 0.

During the time the Compiler is a member of the Service, Part I will be corrected at the commencement of every succeeding year, and any necessary sentences added to Parts II, III, IV, V, as may be deemed necessary in order to keep the Code as perfect as possible.

XIII.

When the Master Attendant or Deputy Master Attendant are afloat, the vessel they are on board of will carry his Flag at the Main. When any of the Assistants are on board, his Flag will be shown at the Fore.

ADDENDA.

In Clause IV of the General Instructions it is to be always understood that Government Vessels *make the numbers* of the Vessel they wish to signalize to *before hoisting* the Code Signal.

Government Vessels wishing to signalize with Merchant Vessels will in all cases make the Vessel's number they signalize to with a white flag underneath ; this will show the Pilots' Code is to be used.

Government Vessels wishing to signalize to Lighthouses, Light Vessels, Signal or Telegraph Stations, will adopt the same plan as is mentioned in Clause I of Addenda.

Lighthouses, Light Vessels, Signal or Telegraph Stations wishing to signalize with Merchant Vessels, will make the Vessel's number in Marryatt's Code, white flag underneath.

Lighthouses, Light Vessels, Signal or Telegraph Stations wishing to signalize with Government Vessels, will adopt the same plan as is mentioned in Clause I of Addenda.

It now only remains to mention the reason for transposing the flags in Marryatt's Code, as has been done in order to make two distinct Codes with one set of flags.

Supposing a Pilot Vessel wishes to signalize the number of Officers on board, and this number happens to be as follows :—

Viz., one Branch, one Brevet Branch.
„ Senior Master, one Junior Master.
„ Senior Mate, one Junior Mate.

From the above it will be seen that six flags are required, and, to make this signal with one hoist, it would require three distinct Codes; as six flags are to be hoisted all together and all meaning the numeral one, therefore, if the flags in the Pilots' Code had been placed exactly in the same manner as those in Marryatt's Code, these signals could not have been made but with one hoist; this would have been No. 1, and the white flag underneath the answering Pendant, which repeats the numeral of the upper flag.

In order, therefore, to avoid any confusion, should it be found requisite to make such a signal as the one given, the following rule will answer:—

One Branch and one Brevet Branch, distinguished by No. 1 and No. 4 Marryatt's, with answering Pendant between, at the Peak.

One Senior Master and one Junior Master with No. 1 and No. 4 Marryatt's, with second Pendant between, at the Main.

One Senior Mate and one Junior Mate, the 4th Distinguishing Pendant Marryatt's and White Flags, with third Pendant Marryatt's between, at the fore, so that with two sets of flags, all these signals can be made with one hoist; it is therefore to be distinctly understood that when showing the number of Officers, the fourth Pendant in Marryatt's Code hoisted at the fore or an upper flag conveys the same meaning in number as the upper flag, at the Main and Peak, when not hoisted singly.

RIVER SURVEYORS' SIGNALS.

I.

A large Blue Flag over a signal when shown from any of the Surveying Vessels, or from any Telegraph Station, denote such signal to be from River Surveyor.

II.

All signals referring to names and position of Buoys, will be made from Part III of Pilot's Code.

III.

All signals referring to names of places and river marks will, in like manner, be made from Part IV of Pilot's Code.

IV.

When the Telegraph Flag in Marryatt's is seen next below the Blue Flag, the signal is a sentence, and will be found at each end of the sentences placed alphabetically.

V.

The Compass Signals will be made as in Part V of Pilot's Code.

VI.

All depths of water will be signalized reduced to zero in feet by the Numeral Flags of Marryatt's Code, with Marryatt's Numeral Pendant over.

VII.

All distances will be in like manner shown in yards.

VIII.

All description of vessels, whether Government or Merchant, when within signal distance of any of the Surveying Vessels, or of any Telegraph Station in any part of the river, observe flying on board of any such vessel, or at any such Telegraph Station, a large Blue Flag over a signal, such signal is to be noticed and the purport of it to be acted upon, as all such signals will refer to changes in the Channels, changes in the positions of Buoys, changes in the colours of Buoys, changes in the depth of water, or any other information important to the safe navigation of vessels.

IX.

Signals from River Surveyor to vessels passing up and down will be found at the end of, and separate from, Parts III, IV, and V placed alphabetically.

PART VII.

NIGHT SIGNALS.

PART VII.

NIGHT SIGNALS.

LANTERNS BY THEMSELVES.	SIGNIFICATIONS.
             	<p>Send me a Boat.</p> <p>I will join you from the Steamer.</p> <p>I will take you out at day-light.</p> <p>Anchor.</p> <p>Weigh.</p> <p>Come within hail.</p> <p>I will take you out now.</p> <p>Lay to on the Starboard Tack.</p> <p>Lay to on the Portack.</p>

Note.—Night Signals to be answered by a single Light, or if a Light be up by a Maroon ; a “Blue Light” singly is affirmative, a “Gun” is negative.

When Night Signals are shown a space of three feet is to be kept between the Lanterns.

PART VII.

NIGHT SIGNALS.

LANTERNS SHOWN WITH A "MAROON."	SIGNIFICATIONS.
	My Boat is capsized ; try to save the crew.
